

PHASE 2: Synthesis of information

B. Let's talk about history: a radio broadcast

1. Human civilization in a few selected artifacts

- NASA has decided to send some artifacts representative of human civilization of the antiquity in a capsule, in a mission to Mars.
- Each team will choose one of the most representative masterpieces and record one podcast, explaining why you consider this artifact (from Ancient Egypt, Greece, or the Roman period) should be included in the mission.
- After we listen to all the podcasts recorded we will vote for the one that should be sent to the outer space.
- Your model: BBC podcasts: "The history of the world in 100 objects" (you cannot choose an object that already appears in the program though!)

<http://www.bbc.co.uk/ahistoryoftheworld/>

<http://www.bbc.co.uk/podcasts/series/ahow/all>

- You will record yourselves as interviewers and interviewees (possible roles: historian, archeologist, museum guide, visitor, etc.) using <https://audioboo.fm/> or <http://vocaroo.com/>
- You need: a script (good preparation at home is essential) + silence + a microphone.
- Then upload your podcast on a padlet wall (<https://el.padlet.com/>)

2. Time to make up your mind!

Which representative artifacts of human civilization should we send to Mars?

After listening to the podcasts: **vote!**

One vote per person only! We use <http://doodle.com/voting-website>
